SAFETY FOR FARMERS

When Working with Animals

Remember...

- All bulls should be ringed
- Housed bulls should be kept in a properly designed bull pen
- Cull aggressive bulls before it's too late
- Handle freshly calved cows and heifers with great care
- Safe, well designed facilities are essential for testing livestock
- Releasing housed livestock in spring is a high risk activity
- Check grazing livestock from a safe distance or use a vehicle
- Never put an inexperienced handler or a child at risk with cattle
